

Quarantine Homestay Experience

Need to quarantine when visiting the UK? Don't let that stop you travelling!

UK borders are open and our government has introduced air bridges allowing many countries to travel to the UK without the need for quarantine. Great news. But some countries still need to quarantine for 14 days from arrival, but how? Book a quarantine homestay!

Many of our experienced homestay hosts are available to host students during their quarantine period. We have families available across the UK and in Dublin who are ready to accommodate students and offer them a family away from home experience, treating them as a part of their family. We have hosts available to cater all to ages, support them with local COVID guidelines, take care of their needs when they need to self-isolate at home and talk and interact with them which will no doubt help them more than ever with their English.

ASSURANCE AND SAFETY CHECK

Our host families are all COVID risk-assessed in addition to meeting the requirements from the British Council. Hosts International will guide the homestays regarding the government advice and guidelines in relation to self-isolation and quarantine. This includes health and safety, particularly related to COVID-19 and safeguarding. Most have been hosting students for several years already and after living through the pandemic are best equipped to take care of incoming students and show them the ropes.

COSTUMISED SERVICES

Students will have their own comfortable bedroom and will have access to all the common areas of the house during their stay with the homestay host. Many hosts live in residential areas, offering access to gardens and outdoor spaces where the student can get fresh air and daily exercise. We also have families available that can accommodate students in a separate part of the house to offer more flexibility and privacy (these are subject to limited availability).

HOMECOOKED MEALS

As the students will be in quarantine, everything will be provided for them including three proper meals per day so they need not worry about fending for themselves, for food or anything else.

CONTINUED LEARNING

The student will still be able to continue online studies in the comfort and safety of a homestay environment. The hosts can also help the student be equipped with knowledge, experience, and understanding in preparation for face to face learning.

GET TO KNOW THE PLACE BETTER

Travelling to a foreign country can get overwhelming and staying in a homestay accommodation would help the students have a better idea regarding the rules and guidelines of the location. The hosts with has lived with the pandemic and in quarantine will give your students an opportunity to settle down and settle in.

SUPPORTIVE ENVIRONMENT

Our homestay hosts will support your students during their period of stay. They will provide them with needed knowledge and support to help them cope up with the new-normal set up. Staying in a homestay accommodation also provides them with human interaction and the presence of caring people. This eases feelings of being overwhelmed, anxiety, worry, and boredom. We at Hosts International are also here to provide continuous support to our host families.

TRANSFERS

We can also arrange COVID-19 transportation with our reliable partners. Safety measures are put in place to ensure health and safety of passengers including wearing of masks, use of hand sanitizer, disinfecting of surfaces between passengers. We can arrange transfers to and from the airport, homestay and school.

SO TRAVEL AGAIN, TRAVEL TO THE UK TO ENJOY AND EXPERIENCE ALL THE GLORIOUS THINGS ON OFFER, THROUGH HOMESTAY ACCOMMODATION!
